2020 Utah Geological Association Fall Field Trip

October 2, 2020

To be held in conjunction with publication of Guidebook #49
**“Earth’s Renewable, Energy and Mineral Resources
Moving Towards the Future”**

Map source: Utah Geological Survey Interactive Geologic Map Portal, <https://geology.utah.gov/apps/intgeomap/>

On Friday October 2, we will explore the Geology and Mining of the past, present and future of the Oquirrh Mountain Range from the east side to the west side. Stop leaders will speak on a variety of subjects including geologic mapping, structural geology, geohazards, debris flows, the closure of historic shafts, reclamation and the potential for future deposits. Registration will open in May
